1 Executive Summary

1.1 Introduction

In 2015, the Pensions Regulator (TPR) assumed responsibility for Public Sector Pension Schemes. Prior to this, in June 2010, TPR issued guidance on the approach that they consider to be good practice for measuring the presence of member data. Specific targets were set for data TPR deemed as 'common' and Aquila Heywood has assisted customers in the collection and qualification of this data. TPR also outlined 'scheme-specific' data but did not set prescriptive targets as the data is deemed to be scheme-specific. The guidance did target Pension Scheme Trustees to ensure that 'reasonable endeavours' were undertaken to provide evidence of assessment and measurement, together with an action plan to meet the scheme specific targets.

To assist customers in undertaking a practical assessment of their scheme-specific data, Aquila Heywood offers a Data Quality service.

1.2 Data Quality Service

Working with the City and County of Swansea Pension Fund (Swansea), Aquila Heywood has completed a review of Swansea's scheme-specific pension data in line with the guidance notes set down by TPR detailed in appendix A. Aquila Heywood's understanding of the Local Government Pension Scheme data, benefit calculations, interfaces and processes, has assisted in the agreement of which items to test. The tests to satisfy each condition have been run and the results quantified to provide guidance on any corrective action required.

The following terms should be understood to aid understanding of the conditions used and the results obtained:

- **Data condition** – identified TPR condition, for example check that an active member does not have a date of leaving
- **Data category** – grouping of relevant data conditions, for example **Member Benefits** (see section 1.4 below)
- **Data item** – item of data which forms part of a data condition for example 'date of leaving'

The service incorporates in the order of 100 individual tests against the data conditions agreed with Swansea. To provide focus on the key areas of scheme-specific data to be addressed, each data category is measured against an agreed benchmark.

In 2019, a set of “core” tests were identified for reporting to TPR. The results to be quoted to TPR are quoted separately from the overall test scores. For details of where the TPR tests differ from the overall tests, please refer to appendix C.

1.3 Benchmark

The benchmarks applied to the results presented in this report were agreed between Swansea and Aquila Heywood. The categories and thresholds are as follows:

Category	Pass Threshold
Blue	Pass rate \geq 98%
Green	95% \leq Pass rate $<$ 98%
Amber	90% \leq Pass rate $<$ 95%
Red	Pass rate $<$ 90%

These benchmark ranges are illustrated in the background of subsequent results graphs.

1.4 Summary of Scheme-specific Data Results

The graph below indicates Swansea’s performance for each data category against the agreed scheme benchmarks together with the results from the 2019 tests. Also below is an explanation as to the data conditions relevant to each data category. The results presented herein are generated from data extracted from Swansea’s Live Altair service on 4th June 2020 for all tests. The 2019 tests were generated from data extracted on 7th June 2019. The overall percentage of tests passed for Swansea’s scheme-specific data is **97.1%**, the same score as in 2019. The percentage of member records without a single scheme-specific data failure is **89.1%**. This represents an improvement of 1% over the 2019 score of 88.1%.

The total number of member records tested is 75,833, an increase of 3,463 records from the number tested in 2019.

1.4.1 Member Benefits Data

This category includes those data conditions for members that directly relate to the details of benefits in payment or to the calculation of benefits yet to be paid.

A total number of 32,939 members qualified for one or more checks as part of the in-scope conditions under this category, an increase of 338 on 2019. Swansea set a minimum 90% benchmark target and achieved a **99.8%** pass rate, placing it in the highest blue benchmark. This pass rate is a **0.3%** improvement on 2019. The detailed analysis of each condition is in Section 2.1, but all of the 10 Data Conditions specified attained the highest benchmark category (Blue, >98%). The lowest scoring condition was **Divorce Details**, where only 1 member of 53 failed the tests leading to a pass rate of **98.1%**. This represents a slight improvement on the 2019 score of 98%.

1.4.2 Other Member Data

This category includes those data items that may be used in the calculation of member benefits.

A total number of 46,488 members qualified for one or more checks as part of the in-scope conditions under this category, an increase of 688 on 2019. Swansea set a minimum 90% benchmark target and achieved a **98.0%** pass rate, attaining the blue benchmark. This pass rate a **0.2%** improvement over 2019. The detailed analysis of each condition is in Section 2.2 with 5 of the 7 Data Conditions specified attained the highest benchmark category (Blue, >98%). The lowest score was on the **Contributions** condition, where **90.7%** of members passed. This represents a **1.3%** increase on 2019. The other condition not to achieve the highest benchmark was **Salary**, where **97.1%** of members passed. This score is the same as in 2019.

1.4.3 CARE Benefits

This category includes those data items required to calculate Career Average Revalued Earning (CARE) benefits.

A total number of 27,746 members qualified for the checks as part of the in-scope conditions under this category, an increase of 1,132 on 2019. Swansea set a 90% minimum benchmark target and achieved a **91.2%** pass rate, placing CARE benefits in the amber benchmark. This pass rate represents a **1.8%** decrease on 2019. Failures in this category require investigation as CARE data directly affects member benefits.

As CARE revaluation is calculated for each member from a single factor table, the table itself is checked for a complete list of factors and was given a 100% pass. The detailed analysis of the conditions is in Section 2.3. Fails in this category directly affect the calculation of member benefits and so should be resolved as a priority.

1.4.4 HMRC

This category includes those values recorded as a result of the Finance Act 2004 as well as Pre A-Day limits.

A total number of 39,483 members qualified for one or more checks as part of the in-scope conditions under this category, an increase of 292 on 2019. The conditions within this category have been expanded for clarity and are detailed in Appendix B.

Swansea set a 90% minimum benchmark target and achieved a **98.7%** pass rate placing the category in the highest blue category. This pass rate represents an increase of **0.1%** on 2019. The detailed analysis of each condition is in Section 2.4. The highest benchmark was achieved in 5 of the 7 categories. The **BCE 7 (Death Benefits)** condition attaining a pass rate of **88%** placing the condition in the red benchmark, this is however an improvement on the 2019 score of 86.1%. The bulk of cases did not have a death grant recorded where one was expected.

The **AA Charge** condition recorded a fall in pass rate with a score of **96.5%**. This represents a decrease of **0.4%** from 2019. There has been an increase in the number of members without the latest Pension Input recorded and the reason for this should be investigated.

1.4.5 Contracting Out

This category includes those data items required to meet scheme contracting out conditions.

A total number of 43,493 members qualified for one or more checks as part of the in-scope conditions under this category, an increase of 5 on 2019. Swansea set a 90% minimum benchmark target and achieved a **92.3%** pass rate, placing Contracting Out in the amber benchmark. This pass rate **0.1%** higher than in 2019. The detailed analysis of each condition is in Section 2.5 but the highest individual score was achieved in the condition **Date Contracted Out**, where **99.7%** of members passed. The remaining three categories in Contracting Out were benchmarked as red with scores between 78.5% and 80.9% and all three showing a slight decrease on the 2019. Fails in this category are likely to have an impact on GMP Reconciliation and so should be resolved either in advance, or as part of the GMP Reconciliation process.

1.5 TPR Scheme-specific Data Core Test Results

The percentage of member records that did not fail any of the tests deemed to be in the core list of TPR tests is **93.7%**. This is the figure to be quoted on the scheme return to TPR. This is a decrease of **0.9%** on the 2019 score of 94.6%. The results for each qualifying category are shown below:

1.6 Other Information

The remainder of this report is split into the following sections:

- **Scheme-specific Data Results** – results of each in-scope condition per category along with the number of members tested, main failures and suggested risks and actions
- **Appendices** – details to qualify failures against each condition, along with a list of TPR's guidance relating to the Local Government Pension Scheme

Where possible, Aquila Heywood has provided advice and suggested next actions to work with Swansea in implementing a solution to any data anomalies. This document is the start point for Swansea data management policy and Aquila Heywood will agree with Swansea the appropriate frequency to repeat these conditions and demonstrate progress in scheme-specific data cleansing.

3 Data Correction Plan

The table below provides Swansea with suggestions for resolving the issues identified in Section 2 and a suggested priority. This table is deliberately high-level as the detail and dates should be agreed once the results have been thoroughly reviewed. The milestones represent a summary of the recommended actions outlined in more detail in Section 2.

4 Appendices

4.1 Appendix A – TPR Guidance (In-Scope Tests)

Member Benefits

Condition	Status Tested	TPR Guidance
Pension Sharing Details	Active, Deferred, Pensioner	If a member has had a pension sharing order, check that full details of the benefits transferred to the ex-spouse/ex-civil partner are present.
Transfer In Details	Active, Deferred, Pensioner	If benefits have been transferred in, check that all relevant details are recorded. This will include (as a minimum) the details of the previous scheme, the amount of the transfer value (split between protected rights and non protected rights and, if relevant, split between the amount received in respect of the member and employer contributions and AVCs), benefits secured, (if relevant) contracting out details.
AVC Details	Active, Deferred, Pensioner	Check that there is a history of any AVCs paid, type of investment, current provider, and (if relevant) benefits being secured
Total Original Deferred Benefit	Deferred	Check that total original deferred benefit is present (either derived or explicit).
Tranches of Original Deferred Benefit	Deferred	Check that there is a breakdown of the various tranches of the total deferred benefit. This must identify tranches with different rates of increases either in deferment or in payment, and tranches with different contingent spouse's/civil partner's benefits. Likely to include such items as pre/post 1997 splits, pre/post 2005 splits, Barber splits, VFM underpin etc. Details of the date at that any tranche is payable, if different from the scheme's normal retirement date, will also be required. The sum of the individual components must equal any total deferred pension that is recorded on the system.
Total Gross Pension	Pensioner	Check that a total pension is present (either derived or explicit).

Condition	Status Tested	TPR Guidance
Tranches of Pension	Pensioner	Check that there is a breakdown of the various tranches of the total pension, identifying tranches with different rates of increase and contingent spouse's/civil partner's benefits. The sum of the individual components must equal any total pension that is recorded on the system.

Other Member Data

Condition	Status Tested	TPR Guidance
Date of Leaving	Deferred, Pensioner	For trust-based schemes, check that member has a date of leaving that is after date joined
Date Joined Scheme	Active, Deferred	Check that the date joined scheme is present, later than date of birth, and not earlier than date joined company. False dates should be classed as missing data.
Date joined employing company	Active, Deferred	For members of multi-employer schemes check that date joined employing company is present and is later than date of birth. False dates should be classed as missing data.
Salary	Active, Deferred	Check that there is at least one relevant salary within the last 12 months of membership.
Salary History	Active, Deferred	Check that a relevant salary exists for each of the last 5 renewal periods of membership and is greater than £0.50.
Contributions	Pensioner	For contributory schemes check that there is a contribution amount present for each year of active membership, or that a contribution total is present.
Date of leaving (date pensionable service ended)/ date last premium/contribution paid	Deferred, Pensioner	For trust-based schemes check that member has a date of leaving which is after date joined scheme, and that member status is not active if date of leaving is present.

CARE Data

Condition	Status Tested	TPR Guidance
Accrued benefit details	Active, Deferred, Pensioner	Check that accrued benefit details are present if they are updated and recorded annually. If benefits are calculated from first principles when member leaves, all relevant salary & contribution will be required instead.
Revaluation percentage	Global Table	Check that there is a history of revaluation percentage for the accrued pension for each relevant year, if benefits have not been not uprated and recorded annually.

HMRC

Condition	Status Tested	TPR Guidance
Benefit Crystallisation Event Details	Active, Deferred, Pensioner	Check that full details of the dates and amounts paid at each benefit crystallisation event, including details of LTA percentage used, are present.
Lifetime Allowance Charge Paid	Pensioner	Check that the date and amount of any lifetime allowance charge paid is present.

Contracting Out

Condition	Status Tested	TPR Guidance
Date Contracted Out	Active, Deferred, Pensioner	Check that this is present and not earlier than 06/04/1978.
N.I. History (Contracted Out earnings & contributions)	Active, Deferred, Pensioner	Check that members have a full contracted-out history during any period contracted out on a GMP basis. A verified GMP, agreed with NISPI, would be an acceptable alternative. Not required for reduced rate females.
Pre 88 GMP	Deferred, Pensioner	Check that a member with at least one month of pre 4/88 contracted out service has a pre 88 GMP. GMP must be divisible by 52. May be derived if total GMP and post 4/88 GMP are recorded.
Post 88 GMP	Deferred, Pensioner	Check that a member with at least one month of post 4/88 service contracted out on a GMP basis has a post 88 GMP. Can be derived or explicit.

4.2 Appendix B – Benefit Crystallisation Events (In-Scope)

Benefit Crystallisation Event	Description
BCE2	Where a member becomes entitled to a scheme pension, whether from a defined benefits arrangement or a money purchase arrangement.
BCE5	Test the level of entitlements not taken by a member at age 75 under a defined benefits arrangement, by measure of the level of benefits that would come into payment at that time, if drawn.
BCE6	A lifetime allowance test is triggered through BCE6 whenever a member becomes entitled under a registered pension scheme to: <ul style="list-style-type: none">• A pension commencement lump sum paid before age 75, when uncrystallised benefits are drawn under an arrangement• A serious ill health lump sum paid before age 75, where the individual falls into serious ill health• A lifetime allowance excess lump sum where a chargeable amount has been identified because the individual's lifetime allowance has been fully used up.
BCE7	Where a relevant lump sum death benefit is paid on the death of the member.
BCE8	Where a member's benefits or rights are transferred to a qualifying recognised overseas pension scheme.
